Location

Robert B. Gawne NEBB Training and Education Center
8575 Grovemont Circle
Gaithersburg, MD 20877

Registration Deadline:

July 25, 2025

August, 25-27 2025

Patrick Law

Patrick Law is founder and past owner of a cleanroom certification company (HEPATEST, Inc.) with over 30 years of experience in performance testing and certifying cleanrooms. He serves on the Cleanroom Performance Testing discipline committee. He has taught numerous seminars and helped develop NEBB's cleanroom programs and cleanroom standards. Patrick is very active in other industry organizations such as IEST, ISPE, and CETA.

Tiffany Russell

Tiffany Russell is founder and owner of VTG, LLC located in the Pacific Northwest. She serves on the Cleanroom Performance Testing discipline committee. Within NEBB she is a CPT Certified Professional, appointed, and is a Certified Professional in Sound Measurement. With over 22 years of industry experience, she has traveled the world supporting customers and is a member of other industries and organizations promoting critical environment testing such as IES, IEST, and CETA.

About This Seminar:

Cleanroom testing must be performed to ensure that cleanrooms comply with design and performance criteria. Typically done by third-party professionals, cleanroom testing identifies deficiencies and conformity to cleanroom testing standards and documents. This practice helps owners to verify system performance and ensure regulatory compliance.

NEBB cleanroom Certified Firms require instruments to perform testing and at least one CPT Certified Professional who conducts cleanroom performance testing in accordance with the NEBB Procedural Standards for Certified of Testing Cleanrooms. The Cleanroom Performance Testing Seminar provides practical instruction needed for this specialized discipline. Attendees will learn from professional presentations, class lessons, and interactive discussions.

Learning Objectives

- Understand the NEBB Procedural Standards for Certified Performance Testing of Cleanrooms
- Learn best practices for certified testing of cleanrooms in healthcare, pharmaceuticals, microelectronics, and other environments.
- Review critical guides, standards, and codes for cleanroom testing.
- Analyze case studies focusing on real-life scenarios and solutions.

Seminar Topic Overview

- Air Velocity and Volume testing
- Room Classification and Standards
- Room Pressurization
- Leak Testing HEPA Filters using a Photometer
- Leak Testing HEPA Filters using a Particle Counter
- Optional Secondary Cleanroom Test
- Cleanroom Protocol and cGMP
- Report Review
- SOP and SOP Generation
